

Santex Rimar Group under the motto Connecting the future

HOLOCAR:
EXPLORE
ALL OUR
CUSTOMIZED
APPLICATIONS

Stefano Gallucci, Santex Rimar Group CEO.

Santex Rimar Group is a customized machinery manufacturer and a process consultant which offers to customers many different solutions and applications from its large portfolio. Santex Rimar Group Technical Textile Division under the motto Connecting the Future presented full range of potential uses of textile technologies at the recently concluded Techtextil fair in Frankfurt.

“We offer substantial advantages such as up-downstream process expertise and integrated products/process service support” said Stefano Gallucci, Santex Rimar Group CEO.

He added: “Customers appreciate personalized products with premium properties. Today they can focus on what they need and we can provide them the solutions.”

During Techtextil, Santex Rimar Group presented HOLOCAR, an automotive-oriented virtual tour of the

technical textile portfolio applications and solutions using a 3D augmented reality tool.

Santex Rimar Group automotive applications include:

ISOTEX coating lines (transfer coating line), lacquering and embossing line (all specifically designed to meet the requirements of the automotive industry) for airbags, door panels, headliners, steering wheels, sun visors, protective films and seat covers;

CAVITEC lamination, coating, impregnation solvent free lines for carpet coating, trunk and parcel shelf, structure and cosmetic parts carbon.

SANTEX NONWOVENS offers thermobonding solutions for heating and floor insulation, air filtration, wheelhouse and batteries.

SMIT technical fabrics weaving lines for airbags, car protection and covering,

seats and seat belts, carbon fibre components.

HOLOCAR has been developed together with weAR, an Italian start-up company who won Premio Gaetano Marzotto in 2017. With 71 awards, 51 startups awarded a total prize money of over two and a half million euros and an extended network of a hundred partners, Premio Gaetano Marzotto, promoted by Santex Rimar Group shareholders, is one of the most significant start-up competitions in Europe.

At Techtextil Santex Rimar Group also presented **ISOCARP**, a carpet finishing line manufactured by ISOTEX for woven carpet; wall-to-wall carpet (tuft); bath carpet, mat; synthetic turf carpet and carpet tiles.

The main features of ISOCARP are high quality, excellent energy saving, opportunity of investment recovery in a short time and highly flexible capacity/speed. ♦
